

TSW80P

hollow through shaft

Ø 80

Italsensor Quality System certified according to the UNI EN ISO 9001

Features:

TSW80P incremental hollow through shaft encoder suitable for different industrial applications.

This model is particularly suitable for electric motors as the body and the plastic housing ensures a high immunity to interference on the output signals.

Shaft diameters changeable by user through reducing bushes.

- fixing system through antirotation pin;
- resolution up to 2048 ppr, others on demand;
- shaft diameters changeable through reducing bushes;
- protection degree IP54;
- cable output.
